PRODUCT RECALL NOTICE

The purpose of this Product Recall Notice is to advise Salisbury customers of a recall of “Link Stick” tools.

Failure to follow these instructions could result in serious personal injury or fatality.

Link Stick tools are used to physically suspend and electrically isolate conductors during maintenance activities.

It has come to our attention that the Link Stick tools sold between October 1, 2006 and March 31, 2015 with part numbers listed in the table below may have connection issues that may cause the product to mechanically under-perform as designed. The metal end fitting may separate from the fiberglass center section at a force lower than designed.

Included in the recall notice are:

- All Salisbury® branded parts listed below.
- Some parts may carry the SafetyLine™ brand.

Parts made prior to October 2006 not included in the recall notice are:

- SafetyLine™ branded parts without the Salisbury® brand
- Any parts with orange or brown fiberglass.

The product part numbers that may be affected are as follows;
